PROCEDURE FOR CARRYING OUT CURRENT CONTROLS (MODULES) IN NORMAL ANATOMY

The procedure was developed in accordance with the "Regulations on the current monitoring of progress and intermediate certification of students" dated 09/05/2017 and the order of the vice-rector of educational activities No. 184 of 06/12/2018.

Modules are submitted in written form according to CHECK-LIST developed at the department in accordance with the approved educational programs. The checklist is an element of the fund of assessment tools designed to assess the theoretical knowledge and practical skills of the student during each module (section) of the discipline "Human Anatomy".

The checklist includes two parts: I - theoretical part and II - practical part. The time for writing answers in check-list (theoretical + practical parts) is 30 minutes. The maximum number of points in the theoretical part is 70 points, in the practical part - 30 points. The module is evaluated on a 100-point scale, as the sum of points for the theoretical and practical parts: 0-69 points - the module is not passed; 70-79 points module passed on "satisfactory", 80-89 points - the module passed on the rating of "good", 90-100 points - rating "excellent".

I. The theoretical part involves the formulation of the correct answer to questions of the module. The names of morphological formations should be given both in Latin. For each correct answer, the student receives a maximum of 4 points. The maximum number of points in the theoretical part is 70 points.

II. The practical part contains a list of 10 mandatory morphological structures. Each structure must be correctly written in Latin. Upon completion of the work or the expiration of the time, the student puts his signature and gives the check-list.

After collecting all the checklists, the teacher in turn checks the ability of each student to correctly show the anatomical structures on the preparations. At this time, corrections and additions to the checklists are not allowed. For each correct answer of the practical part, the student receives a maximum of 3 points (the correct Latin name is 1.5 points; the correct display of anatomical structure on the preparation is 1.5 points. Total: 3 points). The maximum number of points in the practical part is 30 points.

The current control (module) is carried out within the classroom hours allocated in the studying schedule, according to the thematic plan developed on the basis of the educational program. Thematic plans for the discipline for each department are presented on the information stand of the department and on the page of the department of the official site of KSMU. Unsatisfactory result of the delivery of the module is considered a current debt. It is possible to retake the module no more than two times during a semester in the classroom of a specific academic group on a schedule within the classroom hours allocated in the schedule for discipline. Dates, retakes are set by the academic group teacher.

To qualify for the first year of study (I course, II spring semester), 2 modules must be passed: 2 modules in the 2st semester - 1) osteology, 2) musculoskeletal system (Arthrosynodesmology and Myology).
The results of the current control do not prevent the students from passing an intermediate control. It is allowed to liquidate current debts (module) in the process of conducting intermediate control, by answering the checklist, which includes additional questions on undelivered modules.

Unsatisfactory intermediate control results without good reason are recognized as academic indebtedness. The elimination of academic debt is allowed no more than two times within the deadlines established by order of the rector of Kazan State Medical University.

Usage of technical means of communication, gadgets without the teacher’s permission during controls is recognized as a violation, for which disciplinary responsibility is envisaged in the manner prescribed by the Internal Rules of students of KSMU. In this case, within 2 days, the teacher prepares and submits to the dean's office an act on violation of the Internal Regulations of students for further actions to bring the student to disciplinary responsibility (obtaining a written explanation of the student, drawing up a draft order on imposing a disciplinary penalty).
